PROFESSIONAL SUMMARY

Software Engineering graduate with a strong foundation in Java and Python, focused on web development, system design and secure application practices. Comfortable building scalable applications, applying core OOP principles and working across the full software development lifecycle. Looking to bring hands-on project experience, disciplined debugging and practical problem-solving to a full-time software engineering role.

EDUCATION

B.S. Software Engineering

September 2022 – July 2026

Bahçeşehir University — Beşiktaş, Istanbul

- Coursework across object-oriented programming, data structures, databases, software architecture and system design.
